June 8, 2006
Date

Response Under 37 CFR 1.116

In response to the Office Action dated February 8, 2006, Applicant respectfully requests reconsideration in view of the following amendments and remarks.

Amendments to the Claims are reflected in the listing of claims which begins on page 2 of this paper.

Remarks/Arguments begin on page 5 of this paper.

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please amend claims 1, 6 and 9 and newly add claims 17-18 so that the current status of all claims is as follows:

Listing of Claims:

1. (currently amended) A method of organizing a plurality of hard copy prints, each of said hard copy prints having an image thereon, comprising the steps of:

obtaining hard copy prints from a plurality of different sources;

grouping the obtained hard copy prints into one or more categories,
each category separated by an associated machine readable instruction form;

~~placing said hard copy prints into a desired order;~~

digitally scanning said one or more categories and said associated
machine readable instruction form to create one or more digitized image
categories and associated digitized category data, respectively;

combining each image of said one or more digitized image
categories with said associated digitized category data said hard copy prints in
~~said desired order to produce a plurality of modified digital image files digitized~~
images; and

storing the modified digital image files.

~~grouping said plurality of digital digitized images in an order in~~
~~which they have been scanned and providing a product or service with respect to~~
~~said grouping of the plurality of digitized images.~~

2. (original) A method according to claim 1 wherein said product comprises an album page.

3. (original) A method according to claim 1 wherein said product comprises a computer storage media having said images.

4. (original) A method according to claim 3 wherein said storage media comprises a CD.

5. (original) A method according to claim 1 wherein said product comprises a digital image file containing said image.

6. (currently amended) A method according to claim 1 further comprising ~~the step of scanning an~~ providing instructions on said instruction form which provides an instruction with respect relating to said images.

7. (original) A method according to claim 6 wherein said instruction provides information as to grouping of said images.

8. (original) A method according to claim 6 wherein said instruction provides information about at least one of said images.

9. (currently amended) A method of organizing a plurality of images provided on a plurality of separate hard copy prints, comprising the steps of:

placing said hard copy prints into a desired order;

placing in front of at least one of said hard copy prints an instruction form capable of being scanned;

scanning said hard copy prints so as to obtain a digital record of said images on said hard copy prints;

scanning said instruction form so as to obtain information provided on said instruction form; and

combining said digital record of said images with said information provided on said instruction form ~~said hard copy prints in said desired order to~~ produce a plurality of modified digital image files.

10. (original) A method according to claim 9 wherein said instructions are followed with respect to said images.

11. (original) A method according to claim 9 further comprising the step of:

providing at least one good and/or service in accordance with said instructions.

12. (original) A method according to claim 9 wherein said instruction is provided in the form of an icon.

13. (original) A method according to claim 12 wherein said icon is provided on a sticker.

14. (original) A method according to claim 12 wherein said icon is automatically associated by said scanner with respect to a particular instruction and/or information.

15. (original) A method according to claim 9 wherein said instruction form includes at least one machine readable instruction.

16. (original) A method according to claim 9 further comprising the step of searching said images using said information provided on said instruction form.

17. (new) A method according to claim 1 further comprising providing a product or service created from said at least one of the plurality of modified digital image files.

18. (new) A method of organizing a plurality of hard copy prints, each of said hard copy prints having an image thereon, comprising the steps of:

- obtaining hard copy prints from a plurality of different sources;
- grouping the obtained hard copy prints into one or more categories, each category separated by an associated machine readable instruction form;
- digitally scanning the obtained hard copy prints and associated machine readable instruction form to create digitized images and digitized category data, respectively;
- storing the digitized images with the digitized category data.

REMARKS

Favorable reconsideration of this application is requested in view of the above amendments and the following remarks. Claim 1, 6 and 9 are amended and claims 17 and 18 are newly added. Support for the amendments can be found on at least page 11, lines 8-23 of Applicants' Specification. No new matter has been added. Claims 1-18 remain actively pending in the case. Reconsideration of the claims is respectfully requested.

In paragraph 9 on page 4 of the Office Action, claims 1-8 are rejected under 35 USC §112, first paragraph, as failing to comply with the written description requirement. Applicants respectfully traverse the rejections. Applicants submit that on page 7, lines 24-27, Applicants' Specification discloses that "for the sake of simplicity in describing the present invention, the following discussion will be directed [to] a system wherein the images [are] provided in the form of hard copy prints that are capable of being digitally scanned." Subsequently, Applicants' Specification discloses "the images to be grouped may be obtained from a variety of different sources." See page 14, lines 18-20. Therefore, Applicants' invention provides for obtaining hard copy prints from a plurality of different sources. Accordingly, Applicants respectfully submit that Examiner withdraw the rejection.

On page 5 of the Office Action, claims 1-16 were rejected under 35 USC §103(a) as being unpatentable over Hiroshima et al. (4,771,551) in further view of Squilla et al. (6,123,362). On page 7 of the Office Action, claims 1-16 were rejected under 35 USC §103(a) as being unpatentable over Hiroshima (4,771,551) in further view of Kato (6,141,111). Applicants respectfully traverse the rejections.

As admitted by the Office Action, Hiroshima does not provide digital scanning. Further, Hiroshima fails to teach or disclose at least combining each image of said one or more digitized image categories with said associated digitized category data to produce a plurality of modified digital image files as recited in Applicants' independent claims. Rather, Hiroshima merely discloses a device to applying angle data marks to original photographs adhered to a cylinder of an image data input scanner. Col. 2, lines 48-53; Col. 4, lines 34-36.

Sequilla fails to remedy the deficiencies of Hiroshima as Sequilla fails to teach or disclose at least combining each image of said one or more digitized image categories with said associated digitized category data to produce a plurality of modified digital image files. Sequilla peels sticker images from a sticker sheet 18 to be placed on a collage. Col. 5, lines 58-60.

Kato fails to remedy the deficiencies of Hiroshima and Sequilla as Kato fails to teach or disclose at least combining each image of said one or more digitized image categories with said associated digitized category data to produce a plurality of modified digital image files. Rather, Kato discloses extra-copy printing wherein images are provided by a digital still camera. Col. 7, lines 37-39.

Furthermore, the cited references disclose obtaining images from a single source rather from a plurality of different sources (i.e., film, CD, uploads etc.) and grouping said plurality of digital images in an order in which they have been scanned.

Therefore, in view of the above remarks, Applicants' claims 2-6, 17 and 10-15 depend from claims 1 and 9, respectively, and include the features recited in the independent claims. Applicants respectfully submit that claims 2-6, 10-15 and 17 are also patentably distinct over the cited references. Nevertheless, Applicants are not conceding the correctness of the Office Action's rejection with respect to such dependent claims and reserve the right to make additional arguments if necessary.

In view of the foregoing it is respectfully submitted that the claims in their present form are in condition for allowance and such action is respectfully requested.

The Commissioner is hereby authorized to charge any fees in connection with this communication to Deposit Account No. 05-0225.

Respectfully submitted,

Attorney for Applicant(s)
